

## Holland Code

My Holland code is SEI. I feel like this describes me perfectly. I love working with kids, especially the disabled and the less fortunate. I feel like they deserve it more than anyone. They have to live their lives being ridiculed and outcaste by others, and I want them to know that all people are not like that. I also like to work with people will suffering with illness because they are so grateful for each day and I like to give them hope. I think I got enterprising because I like to work with others and be a leader. I get an idea in my head and I like to convince people that it is a good idea and it will work. I also think I got enterprising because I am very stubborn and I don't give up and that is a good trait to have as a leader. Lastly, I got investigative. I think I got this one because I am always trying to figure out things, anything. I try to figure out like every detail in anything. I am very aware of things around me and I am very observant of everything.
