My Holland Code

In the classroom activity, for my Holland Code, I got SEI (Social, Enterprising, and Investigative). Although when I took the quiz online, I got SIE and it is basically the same. I got social as the first because I like to converse with others. To me, it is easier to express myself through words. I like to talk to others, seeking to help them find a solution to their problems or make them feel comfortable. I got investigative second because I like to get to the bottom of stuff. I do not like to leave things unexplained. It is very important to me to try and figure out what the problem is even if it is deeply hidden. Lastly, I got enterprising because I like to lead and follow through. I have leadership qualities and I enjoy following through on whatever I start. That is my Holland Code, and it is exactly me.
